DIVISION ACTIVITY

CALLS FOR SERVICE

District 1

Includes all areas within the city limits that are south and east of Interstate 270 and west of the Scioto River. Also includes I270 northbound from US 33 westbound ramp up to Sawmill Road.

District 2

Includes all areas within the city limits that are east of the Scioto River, west of Sawmill Road, south of the Delaware County Line and north of Martin Road. Also includes I270 westbound from Sawmill Road to US 33 and the ramp from I270 southbound to US 33 westbound.

District 3

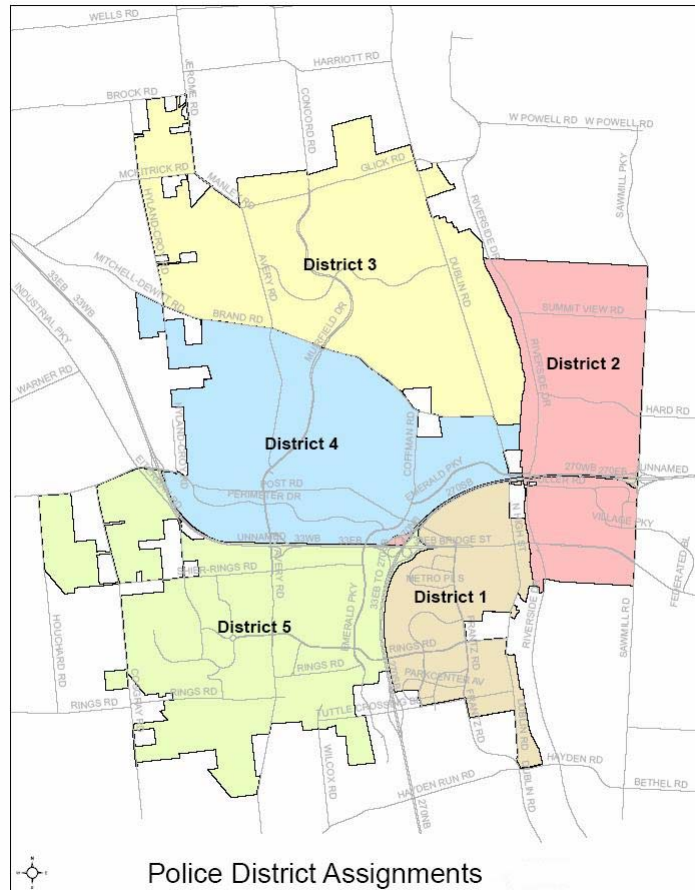

Includes all areas within the city limits that are north of Brand Road and west of the Scioto River. All addresses that are within the city limits on Brand Road including the intersections of Brand Road/Muirfield Drive and Brand Road/Dublin Road are covered by this district.

District 4

This district includes all areas within the city limits that are south of Brand Road, north of US 33 and west of Interstate I270, Browning Court and Dublin Road. Addresses that are south of Brand Road to the I270 overpass that are within the city limits are part of District 4.

District 5

This area includes all areas within the city limits that are south of the north edge of US 33 and west of I270. This area also covers both northbound and southbound lanes of I270 between Tuttle Crossing and US 33 and all ramps to and from I270 south of US 33.

NOTE: The following is a breakdown of calls for service. They represent initial reports. The number of actual offenses may be different after officer's investigation.

WORKLOAD ANALYSIS REPORT

July – September 2007

The July through September 2007 Workload Analysis Report reflects a total of 6,419 calls for service. This figure does not include traffic stops, foot patrols or courtesy cards initiated by officers or activity occurring in District 0 (calls outside city limits/mutual aid). The average response time for calls was five (5) minutes from the time the call was received by our communications technician until the first responding officer arrived on the scene. The average time to reach a disposition and clear the call was twenty-three (23) minutes.

The Workload Analysis Report also allows us to track activity levels by hour by day. We analyze this data to determine our staffing levels for patrol shifts. By reviewing our Workload Analysis Report, you can see that our busiest hour of activity was between 3:00 PM and 4:00 PM. Five hundred and fifteen (515) calls for service were received during this time frame. The next busiest hour was between 4:00 PM and 5:00 PM when five hundred and ten (510) calls for service were received. The ability to obtain this type of data is critical to effectively staff our patrol shifts.

While reviewing this report it is important to note that various factors can influence average response times. "Stacking" of calls where lower priority calls are held so that calls of a more urgent nature can be dispatched and responded to commonly occurs. "Cross dispatching" where an officer is dispatched out of district to a call will also increase response time. Low priority calls that are received during roll call/shift change negate an immediate response from patrol officers thus increasing response times.

As a matter of practice, we like to keep our average response time for all calls occurring inside the City under ten (10) minutes. As previously stated, there are certain incidents where that becomes impossible. However, our goal is realistic and as demonstrated by the July through September 2007 report was met. In an effort to assist the reader in reviewing the Workload Analysis Report the following is a list of some relevant interpretations for review.

Comments: "Myself and the other neighbors of the Heather Glen area very much appreciate the extra enforcement of speeding and stop sign running on Wilcox between Innovation and Woerner Temple. There has been an increase in cut through traffic due to the Avery Road closure, but seeing the Dublin Police making an effort to enforce the laws in the area is comforting. Please keep up the good work and thank you."

Comments continued...

"I feel the Dublin Police provided me very good service with my traffic accident. The officer made sure I was okay before taking any statement from me and that really made me feel good. Thank you for the service you provide the community. Overall you could say I was extremely satisfied with the Dublin Police Department. Thank you!"

"The Dublin Police and staff have been professional and helpful. Thank you."

"Would like a summary/feedback on final outcome of the investigation. Is it still on going? Where are we at with it?"

"The officers are professional, courteous and caring."

"Detective Scott Davis was very professional, helpful and knowledgable (sic). Thank you!"

"Thanks for all of your ongoing concern during a difficult situation. Your follow-up was superior!"

WORKLOAD ANALYSIS REPORT

January – September 2007

The July through September 2007 Workload Analysis Report reflects a total of 19,324 calls for service. This figure does not include traffic stops, foot patrols or courtesy cards initiated by officers or activity occurring in District 0 (calls outside city limits/mutual aid). The average response time for calls was five (5) minutes from the time the call was received by our communications technician until the first responding officer arrived on the scene. The average time to reach a disposition and clear the call was twenty-two (22) minutes.

The Workload Analysis Report also allows us to track activity levels by hour by day. We analyze this data to determine our staffing levels for patrol shifts. By reviewing our Workload Analysis Report, you can see that our busiest hour of activity was between 3:00 PM and 4:00 PM. One thousand nine hundred and sixteen (1,916) calls for service were received during this time frame. The next busiest hour was between 4:00 PM and 5:00 PM when one thousand six hundred and ninety-four (1,694) calls for service were received. The ability to obtain this type of data is critical to effectively staff our patrol shifts.

While reviewing this report it is important to note that various factors can influence average response times. "Stacking" of calls where lower priority calls are held so that calls of a more urgent nature can be dispatched and responded to commonly occur. "Cross dispatching" where an officer is dispatched out of district to a call will also increase response time. Low priority calls that are received during roll call/shift change negate an immediate response from patrol officers thus increasing response times.

As a matter of practice, we like to keep our average response time for all calls occurring inside the City under ten (10) minutes. As previously stated, there are certain incidents where that becomes impossible. However, our goal is realistic and as demonstrated by the January through September 2007 report was met. In an effort to assist the reader in reviewing the Workload Analysis Report the following is a list of some relevant interpretations for review.
