

City of Dublin Residents Survey 2010 - LAUNCHED

Results Overview

Date: 4/27/2010 7:18 AM PST

Responses: Completes

Filter: No filter applied

14. Are there any other ecological/natural resources that are most important to you for preservation and conservation?

#	Response
1	Glacier Ridge Park is an excellent example to remember what Dublin used to be like.
2	Dublin needs to preserve the green space that it has, rather than start infill developments. The green space appeals to people. Losing it will damage the appeal of living in Dublin.
3	MEDIANS AND LANDSCAPING THROUGHOUT DUBLIN MOST IMPORTANT TO BEAUTY OF OUR CITY.
4	no
5	Open spaces/undeveloped land
6	farmland
7	All
8	Our family appreciates Dublin's commitment to greenspace preservation. We don't know of anything specific for this question, but hope that the "green spirit," unique for central Ohio, continues.
9	no
10	cattails
11	Scioto river and wooded banks Indian mounds off Bright Rd. Naturalizing the main streams and waterways within Dublin Waterfalls and old quarry property near Short St. and S. High
12	All of the above
13	Indian mounds on the Holder property should be included in this category.
14	No
15	no
16	No
17	no.
18	No
19	Water and Air Quality
20	Sciota River
21	The Scioto River
22	No, the above are the most needed.
23	no
24	This about covers it.

25	Certain insects - we believe fogging may have killed off bee hives people have been keeping, praying mantis and fireflies.
26	None
27	Allow as much access as possible for boating/fishing, restaurants on the river, private housing on waterways.
28	bird habitats
29	Glacier Park
30	I am pleased with the preservation of Indian Run Falls (i.e., its state of being undeveloped).
31	eed to retain natural barrier preservations beween local "developmebnts and to separate living from business and commercial. rovide annimal habit and breating room.
32	Waterfalls, like the one on the east side of the river north of emerald parkway, south of Bright Rd. It is currently on private property.
33	It's very difficult to select ony five - ALL these resources are interdependent. We must preserve them all.
34	Safe drinking water for all households in Dublin.
35	Unique geological formations, ravines, caves
36	Indian Run Falls area
37	The Scioto River below the historic district could be improved for walking and picnics. I walk our dog there - high water damage will be an issue.
38	Not that I can think of at this time.
39	no
40	no
41	----
42	Indian Run
43	the use of the center as an information sorce by the city to publicly provide an informal forum for public discourse on proposed development, growth, and zoning
44	n/a
45	no
46	Preserve farm land
47	No
48	no
49	None more than others
50	I think ensuring adequate freeway interchanges that can handle traffic patterns is important in preventing any additional pollution related to congestion.
51	Specifically - Glacier Ridge Metro Park and Marshlands (please continue to enhance by adding trials, etc.)
52	Keep up on encouraging recycling. As a result my immediate employer Kroger Co is doing an outstanding job on encouraging compositing of decomposed food waste and on recycling plastic bags and other used containers. As a result we are not only helping our landfills but saving our company many millions of dollars which could be used for further marketing of our stores organization services to our coustomers and offering our employees improved compensation and benefits to aid our state and nations employment situation and training.
53	Schwann Falls is beautiful and would be preserved.

54	no
55	no
56	Natural areas to preserve as best as possible for wildlife habitat.
57	No
58	no
59	The Scioto River.
60	I would love to see a call for community volunteers to help tackle the removal of invasive plant species in our parks and along the bike paths.
61	no
62	No
63	no
64	none
65	no
66	Establish more areas in neighborhoods that are woodland viable
67	co-existence with wildlife
68	Scioto River and Indian Run Waterford Woods Sink Hole
69	Wetlands and Native vegetation
70	indian run falls, etc
71	Land, in general. I've grown up living with the consequences of unplanned growth (sprawl), and I'm tired of not having many choices for housing and neighborhoods other than isolated, inefficient boxes of drywall.
72	None
73	none more than others
74	Glacier Park seems to be a one of a kind resource that should be highly prized and preserved. Sad to hear that some of this park is going, or has, been sold off for commercial use.
75	Topography; Night sky (light pollution); lakes & ponds;
76	peaceful areas/trees
77	I enjoy the green spaces and farming background of the area. With the growth of Dublin many of the fields within the past 2 years have yielded strip malls. It's nice to have large open areas whenever possible to preserve the history of Dublin.
78	no
79	no
80	The falls by the library.
81	not really
82	green space for everyday living areas
83	no
84	not that I can think of
85	no
86	I can't think of any

87	Please stop spraying for mosquitos. Such spraying puts at risk all insects (necessary to preserve our lives), birds because their food source is lost, and us because poisons are poisons. Bad for all of us.
88	No
89	Air quality - environmental clean-up (trash thrown on land/properties)
90	Our river and streams
91	n/a
92	Ash trees
93	Scioto River area near the Bridge in downtown Dublin
94	control the amount of additional surface covered by concrete and blacktop, etc.
95	The more we have, the better. Prevent suburban sprawl.
96	no
97	My property is next to Scioto Park. Scioto Park should have a boundary fence!! People continuously trespass and trash my property, which contains much wildlife and natural features. I cannot keep the people from trespassing. Before creating more parks and/or artistic features, Dublin should improve existing park features, which should include fencing and clearly marked boundaries to protect landowners' rights.
98	No
99	Combining ecological/natural resources with walking trails, etc.
100	bird & mammal habitats & grassland/prairie/ wildflower meadows, native vetation
101	N/A
102	clean water
103	NO
104	The waterfalls behind Sells Middle School.
105	No
106	No
107	wet lands because they are in trouble
108	Any of them.
109	-
110	All of the above are important
111	No
112	Not off-hand.
113	Indian Mounds
114	n/a
115	Having areas conserved is a high priority to me. Dublin is building everywhere and it's getting harder and harder to find places with wildlife and no buildings. It really takes away from the quality of life when this happens.
116	no
117	areas near bike trail
118	Maintaining what's left of our open areas and the Scioto access.

119	enough green space in Dublin
120	no
121	none
122	Dublin should strive to be a leader in this category and pay attention to preservation and the environment.
123	Any and all that are free of trash (blown by the wind)
124	no
125	water quality
126	Actually, all those you listed are important, not just 5 of them
127	No
128	no
129	More Green space. It seems like every free lot has to be built on. Farm land used for developments. I hope the economy slows down this trend.
130	native vegetation
131	No
132	no
133	no
134	Animal habitats, wildflower meadows
135	Indian Run (North and South) Access to Indian Run from the riverfront
136	I want new home builders/office developers to be required to keep MANY older trees on new lots. No more clear cutting.
137	Grassland/prairie/wildflower meadows
138	I would like a nice place where I (and my dog) can walk in the woods or along the river. Not a "preservation" where people are not allowed to walk and explore. also-Open up some "views" along the river. You would never know this town is on a river.
139	Why is there no option for soccer fields in question #12. There are not enough soccer fields. No space to practice.
140	wetlands
141	none that come to mind
142	NEED CONTROL OF CANADIAN GEESE!!!!!!
143	Please please maintain and preserve open spaces in the Dublin Corridor (eg next to Indian Run Falls Park where Sells and Indian Run schools are. The stream and old trees need a good green buffer from the traffic that surrounds the whole area).
144	don't know
145	Water quality is very important for the existing plants and wildlife.
146	No
147	air quality REDUCED MOTORIZED VEHICLES FOR RECREATION USE
148	Removal of invasive plant species from public land.
149	no
150	None

151	Overall preservation of green space and wildlife areas - difficult to select one over another because they are all important - even scenic views which are important for emotional health.
152	clean streams and preserving native vegetation
153	No
154	I live in the Dunmere Neighborhood. The stream that runs behind my neighborhood and that of Sheffield Meadows has had some sewage runoff into the stream with garbage, plastic bottles, outdoor toys, etc. I am concerned that there is not enough effort put into keeping our waterways clean.
155	no
156	no
157	Waterfalls
158	Keeping "green space" along Brand Road and not filling every empty space with a condo development.
159	air quality
160	Re-develop areas rather than swallow up farm and meadow area.
161	Please make every effort to keep the green space and forests as they are and limit encroachment on them.
162	All of the above listed are important to us, but we are only permitted to check 5. I hope Scioto River is included in unique geological features, this is what brought settlement to this area, originally.
163	Not sure
164	Important to keep areas wild with no intervention
165	birds
166	historic trees.
167	ponds need to be kept clean without debris and free of algae
168	No.
169	Public gardens and walking areas through woods/stream areas. Water quality is important, including in reservoirs, even though I did not list it above.
170	This list represents what I believe is important.
171	Please preserve the old farm in the middle of Muirfield (Drake Rd.) The natural stand of shag bark hickory should be preserved.
172	Wooded lots and minimal development
173	no
174	no
175	Don't waste electricity for aesthetic reasons. A balance between safety and waste is important.
